**A. What are the current and recent assessment rates for the remainder, telephone relay, and the four USF assessments?**

Assessments for Remainder, Telephone Relay, Utility Trade Practices, and state USF are calculated in early October of each calendar year. The rates used for the fall billings of a given calendar year are as follows. With respect to the remainder assessment, the actual fiscal year (FY) factor is generally used. In the first year that a company is subject to the assessment, however, it is required to pay both the actual and advance assessment amounts. In the fall of the following calendar year, the advance FY assessment amount will be trued up based on actual revenues subject to the assessment and the actual FY factor.

Current and recent historical remainder and telephone relay assessment rates are shown in Table 1. USF Assessments are shown in Table 2.
