ANNUAL TELECOMMUNICATIONS REPORT GLOSSARY OF TERMS

Access Line	Central office line equipment, or equivalent, and all outside plant facilities, or equivalent, required to connect the serving central office with the customer premises via physical connection, frequency transmission, and/or time slot transmission. From an engineering perspective, a channel connection is at a DS0 level. A DS0 level is a 4 KHz voice channel or a 64 kilobits per second digital channel.
Analog Signal	A signal that varies in a continuous manner such as voice or music. An analog signal must be contrasted with a digital signal which can assume only discrete values.
Cellular System	A high capacity land mobile radio system in which an assigned frequency spectrum is divided into discrete channels that are assigned to a cellular geographic serving area.
Central Office	A switching unit in a telephone system providing service to the general public, having the necessary equipment and operating arrangements for terminating and interconnecting lines and trunks.
Centrex	A service for customers with many stations that permits station-to-station dialing, one listed directory number for the customer, direct inward dialing to a particular station and station identification on outgoing calls. The switching functions are performed in a central office (stand alone, host or remote).
Channel	An electrical communications path between two or more points. A single pair of wires may provide more than one channel. A channel may also be provided by microwave.
Customer	A person who uses a telephone as a subscriber.
Digital Signal	A signal that has a limited number of discrete states. This may be contrasted with an analog signal that varies in a continuous manner and may have an infinite number of states.
Equal Access	The ability of the subscriber to use any long distance service by dialing the same number of digits.
Exchange	A defined area served by one or more central offices regardless of technical serving arrangements within which the company furnishes service at rates and rules prescribed for that area in the company's filed tariffs. The area is not necessarily marked by political boundaries or the location of host or remote switching units.
Extended Area Service (EAS)	The ability of a customer to call customers in other exchanges at no additional charge or at an additional charge per tariff.
Extended Community Calling (ECC)	The ability of a customer to call customers in other exchanges at rates usually above EAS rates but below toll rates for comparable distances. Rates generally include a duration element.
Feature Group A	Line-side originating and terminating LATA access for which an originating subscriber dials an assigned telephone number that connects to a specific interexchange carrier (IC). The IC returns a tone to signal the caller to input additional generated digits of the called number.

ANNUAL TELECOMMUNICATIONS REPORT GLOSSARY OF TERMS

Feature Group B	Trunk-side originating and terminating LATA access for which an originating subscriber dials a 950-WXXX number (where W=0, 1 and XXX is the carrier access code (CAC)), which is translated to a specific XXX carrier trunk group. Optional rotary dial service and ANI may be available.
Feature Group C	Trunk-side LATA access for AT&T-Communications generally on a direct basis between each end office (EO) and an AT&T-C switching system.
Feature Group D	Also referred to as equal access. It is trunk-side LATA access affording call supervision of an interexchange carrier, a uniform access code (10XXXXX), optional calling party identification, recording of access-charge billing details and presubscription to a customer specified interexchange carrier.
FX-IN	A nonswitched service where the customer of the company is connected to and receives switching service through central office equipment located in another exchange area.
FX-OUT	A switched service where facilities are provided from the central office out to the exchange boundary where it meets the line from a foreign exchange subscriber.
Host Switching System	A switching system that provides centralized control over most of the switching functions of one or more remote switching units. The host switching system usually provides trunk access to the operating company intraLATA networks.
Local Access Transport Area (LATA)	A geographic area within which an operating company may offer its telecommunications services.
Mobile Telephone	A service which provides radio telephone communication from a mobile vehicle to another vehicle or to a regular telephone.
Paging	A service which provides one-way signal or voice communication over a radio channel to a miniature receiver carried by the customer.
Pair	Two wires of a single circuit.
Pay Station	A telephone which normally requires all users to deposit one or more coins or use a credit card to complete a call.
Private Line Service	Channel or circuit rented for private use and not intended to be connected to the general distribution system.
Private Branch Exchange (PBX)	A manually, or operator controlled switching system, usually on the customer's premises, which serves that customer's telephones over a common group of lines from the central office.
Radio Common Carrier (RCC)	A company which furnishes public telecommunications service using one or more radio channels.
Remote Switching Unit (RSU)	An electronic switching system that is remote from its host or control office. All of the central control equipment for the RSU is located in the host switching system.

ANNUAL TELECOMMUNICATIONS REPORT GLOSSARY OF TERMS

Route Miles	Total number of route miles (to the nearest mile) of operating plant facilities including drop wire in the exchange. One route mile may consist of: <ol style="list-style-type: none">1. One mile of roadway with any combination of outside plant facilities on any number of rights-of-way.2. One mile of a cross country route with any combination of outside plant facilities.3. One mile of point-to-point microwave or radio link.4. One mile of plant on either side of a limited access highway or natural barrier, such as a navigable waterway.5. One mile of joint use line where the utility either owns the facility or leases space.
Stand Alone Switch	A central office switch which has no remote switching units (RSUs) subtending it.
Trunk	A communications path connecting two switching systems in the establishment of an end-to-end connection.
Wide Area Telephone Service (WATS)	Customer leased access line or lines connected to the nationwide network over which an unlimited number of calls can be made for a fixed monthly charge.
Wire Center	The location of one or more local switching systems. A point at which customers' loops converge.

AFFILIATED INTEREST TRANSACTIONS

Provide a summary of transactions under established affiliated interest contracts and arrangements (see Wis. Stat. § 196.52, for "affiliated interest" definitions). Use the space below to report transactions with individual affiliates and multiple affiliated interest agreements or, at the utility's option, with individual affiliates and a single agreement. Activity associated with affiliated contracts or arrangements not in excess of \$25,000 or 5 percent of the equity of the utility, whichever is smaller, may be aggregated in a single record. For utilities whose intrastate gross operating revenues of the previous year exceeded \$100,000,000, individual contracts or arrangements not exceeding \$100,000 may be aggregated in a single record. Where an affiliate is both providing and receiving service use one record to show billings to and a second record for billings from. When billings to or from an affiliate are recorded on the books of the utility, the records underlying such billings shall be sufficient to show all the detail maintained to identify the associated accounts related to the billing and categorize billings according to the account categories shown below.

Re:1998 Analytical ReviewDWCCA-5680-ELE

Dear Mr. Guetschow:

The Public Service Commission (PSC) is in the process of completing an analytical review of your utility's 1998 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that our review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

1. In a letter dated January 15, 1998, concerning the 1996 annual report, staff inquired concerning the status (e.g., active, terminated) of the affiliated interest agreement between the utility and SLD Cellfone, Ltd. in docket 5680?AT?102. Further review of the Commission's Case Management System reveals that this affiliated agreement has been terminated. Please note that no further response is necessary concerning this item.

2. No docket number is shown for the "FROM" activity for SERVICES and WSLD on page 15 of the report. Please state whether the "FROM" activity is addressed by the affiliated agreements for "TO" activity for each affiliate in dockets 5680?AT?100 and 5680?AT?101, respectively. If affirmative, please confirm that the appropriate docket number should be inserted in each cell. If this is not the case, please be aware that if an activity exceeds the threshold noted in Wis Stat § 196.52 amendment

GENERAL, SCHEDULE LEVEL AND SCHEDULE LINE FOOTNOTES

an activity exceeds the threshold noted in Wis. Stat. § 190.34, amendment of the existing agreement(s) or notice of a new affiliated interest agreement(s) must be provided to the Commission within 30 days of the effective date of the agreement.

3. In the future, please provide the page numbers for the confidential annual report, or the text "as agreed to with the PSC" in the box entitled "Description and subject matter of documents" on the Confidentiality Request form.

4. During our review, we noted that you have not provided the Listing of Schedules with Confidential Locks. Please note that this schedule is required. In the future, please file this schedule.

5. During our review of the Listing of Edit Check Results, we noted the intraLATA and interLATA chan. terms. reported on the Special Access Circuits in Use schedule, page 49, do not agree with the Special Access IntraLATA and Special Access InterLATA reported on the Service Data schedule, page 50 and an explanation was not provided. Please furnish an explanation, or corrected schedules. Please note that both these schedules are filed under confidential treatment.

6. During our review, we could not locate correspondence regarding the review of your 1997 annual report. However, one relevant matter appears to be outstanding. In 1997, it was requested that item 8 of the Important Changes During the Year schedule, page 13, be used to disclose the journal entry(ies) recorded on the telcos books and date of such journal

Schedule Line Footnotes

GENERAL, SCHEDULE LEVEL AND SCHEDULE LINE FOOTNOTES

Increased \$87,006 from 1997 to 1998 due to increased labor and operating costs, and the continuing costs to update our outside plant maps.

The 1998 increase of \$37,832 is because the Federal and Wisconsin Universal Support contributions previously charged to General & Administrative Expense has been changed to Access Expense for 1998, per FCC & PSC order.

D) Customer Operations Expense:

Pursuant to agreement with PSCW staff, this change is not material.

E) Exchange Route Miles:

Route miles of outside plant are not available from Company records.

F) Local Service Revenue:

Revenues increased \$303,211 from 1997 to 1998 due to a \$272,000 rate increase that went in to effect in December 1997, and continued access line growth.

G) Adjustment
