### RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

1998 Analytical Review DWCCA-3390-PJL

Dear Ms. Prill:

The Public Service Commission has completed their analytical review of your 1998 annual report. The primary purpose of our analytical review is to detect possible accounting related errors and to identify significant fluctuations from prior year's data, which are not sufficiently explained in the footnotes of your annual report. We have no questions, only the following comments.

1. Your 1998 annual report was filed after the due date of April 1, 1999. Wis. Stat. § 196.07(1) require annual reports to be filed on or before April 1st. If a utility fails to file an annual report by the due date, the PSC may prepare the report from the utility records charging the utility all expenses in preparing the report, plus a penalty equal to 50% of the amount of the expenses. Please implement timetables for closing of your 1999 financial records and completion of the financial audit to enable timely filing of your 1999 annual report.

2. In the future, as directed in the headnotes of the Water Operation & Maintenance Expenses schedule on page W-5, please explain all significant expense variations.

Thank you for your efforts in preparing your 1998 annual report. You may consider our review closed. If you have any questions, please feel free to contact me at (608) 267-9198.

Sincerely,

Peter J. Leege  
Financial Specialist  
Division of Water, Compliance, and Consumer Affairs
