### RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

2001 Analytical Review DWCCA-0460-PJL

Dear Ms. Hendricks:

The Public Service Commission (Commission) staff has completed its analytical review of your utility's 2001 annual report. The primary purpose of the analytical review is to detect possible reporting or accounting related errors and also to identify significant fluctuations from prior years' data that are not sufficiently explained in the annual report. The analytical review did identify the following issues:

1. As of today's date our office has not received a response to our letter dated October 18, 2001, concerning our review of the utility's 2000 annual report. Please provide your response to the following items at this time:

"Item 1: In the footnotes to page W-16 it is stated that the cost of the 35 services added in 2000 was not recorded in Account 345, Services, because they were paid for by a Tax Incremental Financing (TIF) district. Utility plant installed in a TIF district should be recorded at actual or estimated cost by debiting the appropriate plant account and crediting Account 200, Capital Paid in by Municipality. Please record an adjusting journal entry in 2001 for the actual or estimated costs of these 35 services".

It does not appear that these adjusting entries were recorded in 2001. Please record this entry for 2002 and provide a copy of the adjusting entries in response to this review letter.

"Item 2: By letter dated July 14, 2000, with regard to analytical review of the 1999 annual report, you were reminded of the revised composite depreciation rate of 2.22 percent. However, as indicated on page F-8 the utility used a composite depreciation rate of 1.73 percent rather than the authorized 2.22 percent composite rate. The major construction added in 1999 was in service during all of 2000, therefore the 2.22 percent composite rate used in your last rate case should have been used in 2000".

Therefore, please confirm that the adjusting journal entry provided below will be recorded during 2001 and also confirm that the 2.22 percent composite depreciation rate will be used beginning in 2001.

|     |   |           |  |
|-----|---|-----------|--|
| 403 | Debit Depreciation Expense                    | \$10,632  |  |
| 110 | Credit Accumulated Provision for Depreciation | \$10,632" |  |

## FINANCIAL SECTION FOOTNOTES

---

It does not appear this adjustment was booked in 2001. Please book this adjustment in 2002 and provide copies to this office with your response to this review letter. Also confirm in your response that the 2.22 percent composite depreciation rate was used in 2001.

"Item 3: During our review, we noted you are reporting sales of electricity for "water pumping" under Commercial & Industrial, Rate Schedule No. Mg-1, on the Sales of Electricity schedule, page E-12. This rate schedule number does not exist. In the future, please report these sales with the appropriate rate schedule number for the category of sales using the schedule number provided in your existing tariff. If you have any questions about this matter, please contact Jerry Albrecht, Electric Division, at (608) 267-5111".

You are still using the incorrect "Mg-1" rate on page E-12 of the 2001 annual report. Please confirm that you have contacted Jerry Albrecht at the number above and obtained the correct rate schedule for these sales.

"Item 4: A review of Account 926, Pensions and Benefits, reveals that fringes were not reported in Account 926 and were, we assume, apparently spread over all of the operation and maintenance labor accounts".

This procedure is not appropriate. The current Uniform System of Accounts (USOA) for Municipal Water, Electric and Sewer Utilities requires that expenditures for pensions and benefits be charged to Account 926 and remain there with the exception of amounts appropriately charged to construction or to non-utility operations. The Commission has not authorized a change to the USOA permitting the allocation of this account to all the operation and maintenance labor accounts. Therefore, the utility will have to reclassify these expenditures back to Account 926 in the future to be in accordance with the accounting requirements prescribed by the USOA".

A review of your 2001 report indicates that fringes are still not being allocated to Account 926. Please confirm in writing that the appropriate steps will be taken to ensure that in the future, beginning with the 2002 Annual Report, the accounting for Pensions and Benefits, Account 926, will be reported in accordance with the current prescribed USOA.

2. As directed in the headnotes of the Water Operation & Maintenance Expenses schedule on page W-5, please provide an explanation of the change in Account 640, Operation Labor when compared to the previous year and follow this procedure in the future.

3. As directed in the headnotes of the Water Services schedule on page W-16, please provide an explanation of how the service reported as added during the year was financed.

Responding to the questions posed from the analytical review does not preclude you from possibly receiving other inquiries from our office regarding your annual report in the future: for instance, during a rate case, construction authorization, or other Commission reviews.

We appreciate your cooperation in providing the above information. If you have any questions, please feel free to contact me at (608) 267-9198.

## WATER OPERATING REVENUES - SALES OF WATER

1. Where customer meters record cubic feet, multiply by 7.48 to obtain number of gallons.
2. Report estimated gallons for unmetered sales.
3. Sales to multiple dwelling buildings through a single meter serving 3 or more family units should be classified commercial.
4. Account 460, Unmetered Sales to General Customers - Gallons of Water Sold should not include in any way quantity of water, i.e. metered, or measured by tank or pool volume. The quantity should be estimated based on size of pipe, flow, foot of frontage, etc. Bulk water sales should be Account 460 if the quantity is estimated and should be Account 461 if metered or measured by volume. Water related to construction should be a measured sale of water (either Account 461 or Account 464).
5. Other accounts: see application Help files for details.

### HYDRANTS AND DISTRIBUTION SYSTEM VALVES

1. Distinguish between fire and flushing hydrants by lead size.
  - a. Fire hydrants normally have a lead size of 6 inches or greater.
  - b. Record as a flushing hydrant where the lead size is less than 6 inches or if pressure is inadequate to provide fire flow.
2. Explain all reported adjustments in the schedule footnotes.
3. Report fire hydrants as within or outside the municipal boundaries.

**NR811.08(5) recommends that a schedule shall be adopted and followed for operating each system valve and hydrant at least once each two years. Please provide the number operated during the year**

Number of hydrants operated during year: 72

Number of distribution system valves end of year: 159

Number of distribution valves operated during year: 80

## WATER OPERATING SECTION FOOTNOTES

---

### Water Services (Page W-16)

This adjustment is due to the public works directors review and verification of records which indicate the number of one inch services was overstated by three in the past.

---

### Hydrants and Distribution System Valves (Page W-18)

-one hydrant was not listed in old book of records and has now since been recorded.

-two hydrants were not operated during the year because they are not in working order. These are on the list of hydrants to be replaced.

### MONTHLY PEAK DEMAND AND ENERGY USAGE

1. Report hereunder the information called for pertaining to simultaneous peak demand established monthly and monthly energy usage col. (f) (in thousands of kilowatt-hours).
2. Monthly peak col. (b) (reported as actual number) should be respondent's maximum kw. load as measured by the sum of its coincidental net generation and purchases plus or minus net interchange, minus temporary deliveries (not interchange) of emergency power to another system.
3. Monthly energy usage should be the sum of respondent's net generation for load and purchases plus or minus net interchange and plus or minus net transmission or wheeling. Total for the year should agree with Total Source of Energy on the Electric Energy Account schedule.
4. If the utility has two or more power systems not physically connected, the information called for below should be furnished for each system.
5. Time reported in column (e) should be in military time (e.g., 6:30 pm would be reported as 18:30).
