### FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

## WATER OPERATING SECTION FOOTNOTES

---

### Water Operation & Maintenance Expenses (Page W-05)

For values that represent an increase or a decrease when compared to the previous year of greater than 30%, but not less \$2,000, please explain.

a/c 600 Salaries and Wages - Village employees spent a greater number of hours in 2005 on water related operations. This was due in part to new employee learning water processes and obtaining water certification. In addition, there was backup help to assist him at various times during the year.

a/c 650 Repairs to Water Plant - The utility had two large disbursements in 2005. One was for work on the water tower and another was related to the chart recorders. The two disbursements for these alone was \$ 5,806.

---

### Water Mains (Page W-17)

If Added During Year column total is greater than zero, please explain financing following the criteria listed in the schedule headnote No. 5.

The Utility financed the replacement of 434 feet of water main on Pratt Street. There were no assessments. Funds on hand were used for the project.

The utility also financed addition in the TID Park. A total of 367 feet of main was added. Funds on hand were also used for this project.

---

### Water Services (Page W-18)

If net additions are greater than zero, please explain financing by following criteria listed in schedule headnote No. 3.

The utility financed with funds on hand the addition of one service on Pratt Street and two services in the TID District. There were no retirements.

### Meters (Page W-19)

Explain program for replacing or testing meters 1" or smaller.

The utility tests or replaces meters at the scheduled number of years. 2005 was less than the percentage due to the utility not getting to them as there was a new water utility employee in 2005. Additional testing is anticipated for 2006..

Ss. PSC 185.83(2) states "Station meters shall be maintained to ensure reasonable accuracy and shall have the accuracy checked at least once every 2 years." Are all station meters being tested every two years? Answer yes or no. If no, please explain.

Yes, except due to a new employee, one of the meters was not tested in 2005. They were both tested in 2003. The utility has both of the meters scheduled for testing in 2006.
