## FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

Industry (a)	FTE (b)	
Water	1.5	1
Electric		2
Gas		3
Sewer		4

## RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include contributed plant in service, property held for future use, or construction work in progress with utility plant in service. These are not rate base components.

## IMPORTANT CHANGES DURING THE YEAR

---

**Report changes of any of the following types:**

---

**1. Acquisitions.**

The utility is in the process of major additions to its treatment plant. This work was started in 2009 and will be completed in 2010. That is the reason for the large figure in Construcion in progress at the end of the year. The utility also replaced 850 feet of 6 inch main during the year.

---

**2. Leaseholder changes.**

---

**3. Extensions of service.**

---

**4. Estimated changes in revenues due to rate changes.**

---

**5. Obligations incurred or assumed, excluding commercial paper.**

---

**6. Formal proceedings with the Public Service Commission.**

---

**7. Any additional matters.**

The financing for the water treatment plant additions is from a combination of two sources. The Village has issued Water Revenue Bonds and is also receiving assistance from the Government in the form of loan forgiveness. A total Bond issue of \$992,125 has been authorized. A loan forgiveness in the same amount has also been authorized.

2. Report estimated gallons for unmetered sales.
3. Sales to multiple dwelling buildings through a single meter serving 3 or more family units should be classified commercial.
4. Account 460, Unmetered Sales to General Customers - Gallons of Water Sold should not include in any way quantity of water, i.e. metered, or measured by tank or pool volume. The quantity should be estimated based on size of pipe, flow, foot of frontage, etc. Bulk water sales should be Account 460 if the quantity is estimated and should be Account 461 if metered or measured by volume. Water related to construction should be a measured sale of water (Account 461).
5. Other accounts: see application Help files for details.

### Water Operation & Maintenance Expenses (Page W-05)

For values that represent an increase or a decrease when compared to the previous year of greater than 30%, but not less \$2,000, please explain.

outside services: decrease this year is mainly due to less expenditures for searching for water, which was fairly extensive in 2008.

repairs: repairs this year mainly increased due to a rehab of one of the wells.

### Water Operation & Maintenance Expenses (Page W-05)

For values that represent an increase or a decrease when compared to the previous year of greater than 30%, but not less \$2,000, please explain.

outside services: decrease this year is mainly due to less expenditures for searching for water, which was fairly extensive in 2008.

repairs: repairs this year mainly increased due to a rehab of one of the wells.
