FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

Industry (a)	FTE (b)	*	1
Water	0.0	*	1
Electric	0.0		2
Gas			3
Sewer			4

FULL-TIME EMPLOYEES (FTE)

Full-Time Employees (FTE) (Page F-06)

If number of employees in a regulated department is zero, please explain.

Melvina has no employees; Cashton employees all utility workers.

General footnotes

The prior year Accumulated Provision for Uncollectible Accounts -- Cr. (144)some how was removed. It should contain a (\$5373), which would balance the beginning of the year balance sheet. Not sure how this happened or how to fix it... So we put the (\$5373) in #174 Miscellaneous Current and Accrued Assets so we could eliminate the Fatal Error of the 1st of year total assets and other debits of \$1,130,056 and the end of year total assets and other debts from the prior year report of \$1,135,429.

WATER AUDIT AND OTHER STATISTICS

1. Report actual metered values where possible. If water uses are not metered, estimate values for each line based on best available information. Water entering distribution system must equal the sum of Sales (line 5), Authorized System Uses (line 12) and Water Losses (line 19). For assistance, see AWWWW M36 Manual - Water Audits and Loss Control Programs.
2. For Gallons used in the treatment process (line 3), estimate water used in production including filter backwash, pumps, and other utility uses before the point of entry to the distribution system.
3. For Gallons used for other system uses (line 11), report other unmetered water used for system operation and maintenance, water used for non-regulated sewer utility and all other unmetered usage that is known to occur and does not fall into one of the other categories listed under Water Usage.
4. For Gallons unknown/not accounted for, estimate the volume of water losses due to other real or apparent losses, including customer meter inaccuracies, data errors, and unknown volumes. Unknown/unaccounted for volumes should be minimized to the extent possible.
