FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

| Industry (a) | FTE (b) | |
|-----------------|------------|---|
| Water | 4.0 | 1 |
| Electric | | 2 |
| Gas | | 3 |
| Sewer | | 4 |

RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include contributed plant in service, property held for future use, or construction work in progress with utility plant in service. These are not rate base components.

WATER OPERATING REVENUES - SALES OF WATER

1. Where customer meters record cubic feet, multiply by 7.48 to obtain number of gallons.
2. Report estimated gallons for unmetered sales.
3. Sales to multiple dwelling buildings through a single meter serving 3 or more family units should be classified commercial.
4. Account 460, Unmetered Sales to General Customers - Gallons of Water Sold should not include in any way quantity of water, i.e. metered, or measured by tank or pool volume. The quantity should be estimated based on size of pipe, flow, foot of frontage, etc. Bulk water sales should be Account 460 if the quantity is estimated and should be Account 461 if metered or measured by volume. Water related to construction should be a measured sale of water (Account 461).
5. Report average no. of individually-metered accounts (meters). The amount reported should be the average meter count. E.g., if a hospital has 5 meters, a total of 5 meters should be reported on this schedule in Average No. of Meters column.

WATER OPERATION & MAINTENANCE EXPENSES

Water Operation & Maintenance Expenses (Page W-05)

For values that represent an increase or a decrease when compared to the previous year of greater than 15%, but not less \$10,000, please explain.

ACCOUNT 602 (Purchased Water) - \$19,945

The decrease of \$15,070 was because in 2009 when the Foremost tower was inspected and painted the utility purchased water from Rothschild for a longer period of time then in 2010 when water was purchased for just a couple days.

ACCOUNT 614 (Maintenance of Wells and Springs) - \$14,422

The decrease of \$21,959 was because in 2009 additional work was done at the Foremost well which was not done in 2010.

ACCOUNT 672 (Maintenance of Distrib Reservoirs and Standpipes) - \$2,099

The decrease of \$86,902 was because in 2009 we painted the Foremost Tower and no tower was painted in 2010.

ACCOUNT 673 (Maintenance of Transmission and Distribution Mains) - \$118,360

The increase of \$75,486 was because during the Ross Ave construction project the Village went through and replaced valves that had problems.

ACCOUNT 675 (Maintenance of Services) - \$36,862

The increase of \$13,105 is because the utility went to a problem freeze up area and insulated and lowered problem services.

ACCOUNT 677 (Maintenance of Hydrants) - \$36,703

The increase of \$32,960 is because the utility painted hydrants in 2010 and none in 2009.

3. The assessment ratio is available from the municipal treasurer. Report the ratio as a decimal to six (6) places.
4. The utility plant balance first of year should include the gross book values of plant in service (total of utility financed and contributed plant), property held for future use and construction work in progress.
5. An "other tax rate" is included in the "Net Local and School Tax Rate Calculation" to the extent that it is local. An example is a local library tax. Fully explain the rate in the Property Tax Equivalent schedule footnotes.

WATER AUDIT AND OTHER STATISTICS

1. Report actual metered values where possible. If water uses are not metered, estimate values for each line based on best available information. Water entering distribution system must equal the sum of Sales (line 5), Authorized System Uses (line 12) and Water Losses (line 19). For assistance, see AWWWW M36 Manual - Water Audits and Loss Control Programs.
2. For Gallons used in the treatment process (line 3), estimate water used in production including filter backwash, pumps, and other utility uses before the point of entry to the distribution system.
3. For Gallons used for other system uses (line 11), report other unmetered water used for system operation and maintenance, water used for non-regulated sewer utility and all other unmetered usage that is known to occur and does not fall into one of the other categories listed under Water Usage.
4. For Gallons unknown/not accounted for, estimate the volume of water losses due to other real or apparent losses, including customer meter inaccuracies, data errors, and unknown volumes. Unknown/unaccounted for volumes should be minimized to the extent possible.

WATER MAINS

Water Mains (Page W-21)

If Added During Year column total is greater than zero, please explain financing following the criteria listed in the schedule headnote No. 5.

All main additions in 2010 were financed by the utility except for \$1,994 which was contributed by the Federal Government during our street project where some water utility work was completed.

WATER SERVICES

Meters (Page W-23)

Explain all reported adjustments.

The adjustment of -187 meters is due to a timing difference last year when they were junking meters and purchasing new meters and the time they counted the meters in inventory. Last year had an adjustment of +122 - netting 65 between the two years.

The adjustment in the large meter rows reflects the elimination of station meters from the tables.

Explain program for replacing or testing meters 1" or smaller.

The Utility is attempting to test/replace meters to comply with the Wisc Admin Code, but with staff shortages is falling short. Currently the Utility has a list of meters that need to be tested/changed and is working to get the oldest ones done first and then move to the newer ones.

Ss. PSC 185.83(2) states "Station meters shall be maintained to ensure reasonable accuracy and shall have the accuracy checked at least once every 2 years." Are all station meters being tested every two years? Answer yes or no. If no, please explain.

Yes

2. Explain all reported adjustments in the schedule footnotes.
3. Report fire hydrants as within or outside the municipal boundaries.

| Hydrant Type (a) | Number In Service First of Year (b) | Added During Year (c) | Removed During Year (d) | Adjustments Increase or (Decrease) (e) | Number In Service End of Year (f) | |
