### RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

1999 Analytical Review DWCCA-1790-PJL

Dear Ms. Moioffer:

The Public Service Commission (Commission) is in the process of completing an analytical review of your utility's 1999 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that our review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

1. Wis. Admin. Code § PSC 185.76 requires periodic testing of customer meters to ensure their accuracy. In reviewing the annual reports we determined that not all of your water meters have been tested at the appropriate frequency, the 3 and 4 inch meters in particular. If these meters become inaccurate, considerable revenues are lost. Please provide a copy of your plan to comply with § PSC 185.76. If you have questions in regard to this matter, please contact Bruce Schmidt of our staff at (608) 266-5726.

2. As directed in the head notes of the Water Operation & Maintenance Expenses schedule on page W-5, please provide explanations of the changes in any expense accounts which changed by more than 30% and \$2,000 when compared to the 1998 report.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me at (608) 267-9198. Please respond within 30 days of this letter. If it is convenient for you to respond by e-mail, please do so. My e-mail address is leegep@psc.state.wi.us. If we have no questions regarding your response, you can consider the review closed.

Sincerely,

Peter J. Leege  
Financial Specialist  
Division of Water, Compliance, and Consumer Affairs

## WATER OPERATING SECTION FOOTNOTES

---

### Water Operation & Maintenance Expenses (Page W-05)

The following explanations are per letter rec. from utility on 8/28/00. PJL

A/c 640 increased due to increased testing costs. (\$3,720)

A/c 650, increase due to reservoir cleaning, maintenance or repair as well as chlorinator and switch repairs.

A/c 680, increased because of work done to better organize utility, we are in the process of cross referencing some files, ect. This account also reflects additional man hours that were necessary to work on the water rate increase application.

A/c 681, increased due to a more accurate allocation being applied for supplies and postage. This account is also charged with computer support and updates.

a/c 690, uncollectable accounts, is something the utility does not usually have but did this year due to a bankruptcy.

### Sources of Water Supply - Ground Waters (Page W-11)

Well is dug and capped. It is not presently in service and the cost is financed through the Elkhart Lake Community Development Authority and TID No. 1.

---

### Water Mains (Page W-15)

The addition of the recorded water main was financed through the Village of Elkhart Lake's Community Development Authority and TID No. 1.

---

### Water Services (Page W-16)

Services were financed by the Community Development Authority and TID #1.

---

### Meters (Page W-17)

Adjustments to meter were to record changes found in size from 5/8" to 3/4" that had been recorded incorrectly.

---

### Hydrants and Distribution System Valves (Page W-18)

Majority of the Valves were operated in 1998. How many are operated each year depends on construction schedule, breaks or time available.
