### RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

### Income Statement Account Details (Page F-02)

Interest income increased due to debt issued to retire BANs being deposited for a portion of the year before BANs were paid off.

---

### Balance Sheet End-of-Year Account Balances (Page F-18)

A/C 125 included BAN issuance of \$507,000 in prior year.

Payment for current year hydrant rent was made while last years amount was set up as a receivable. This explains the decrease in A/C 145.

Decrease in A/C 233 relates to payments for wages and tax equivalent made in 2001 versus being set up as payables at the end of 2000.

Dear Ms. Margis:

The Public Service Commission staff has completed its analytical review of your 2001 annual report. The primary purpose of the analytical review is to detect possible reporting or accounting related errors, and also to identify significant fluctuations from prior years data that are not sufficiently explained in the annual report. The analytical review identified the following issues:

1. Please provide an update regarding the utility's efforts to reduce water loss. Please also explain the results of the visit from the representative from rural Water Association on August 9, 2001.
2. During our review, we noted that the amount reported for "Utility Plant, Jan. 1" on the Property Tax Equivalent schedule, Page W-7, is incorrect. The plant amount should include construction work in progress (see schedule head note No. 4). The correct amount should come from the prior year's Net Utility Plant schedule, page F-4. Please follow this procedure in the future.

In addition, you may receive additional inquiries from our office regarding your annual report during a rate case, construction authorization, or other Commission reviews.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me by email or by telephone at (608) 267-9198. Please respond within 30 days of this email. If we have no questions regarding your response, you can consider the review closed.

### WATER UTILITY PLANT IN SERVICE

1. All adjustments, corrections and reclassifications should be reported in Column (f), Adjustments.
2. Explain fully as a schedule footnote the nature of all entries reported in Column (f), Adjustments.
3. Explain as a schedule footnote the dollar additions and retirements reported in Columns (c) and (e) for each account over \$10,000 not supported by statistical schedules.
4. Use only the account titles listed. If the utility has subaccounts other than account 372.1, combine them into one total and detail by subaccount as a schedule footnote.

### HYDRANTS AND DISTRIBUTION SYSTEM VALVES

1. Distinguish between fire and flushing hydrants by lead size.
  - a. Fire hydrants normally have a lead size of 6 inches or greater.
  - b. Record as a flushing hydrant where the lead size is less than 6 inches or if pressure is inadequate to provide fire flow.
2. Explain all reported adjustments in the schedule footnotes.
3. Report fire hydrants as within or outside the municipal boundaries.

## WATER OPERATING SECTION FOOTNOTES

---

### Water Operating Revenues - Sales of Water (Page W-02)

Revenues increased due to rate case that went into effect 4/1/00.

---

### Other Operating Revenues (Water) (Page W-04)

Hydrant rent was adjusted \$7,741 for overcharge in prior year per PSC letter dated July 24, 2001.

---

### Water Utility Plant in Service (Page W-08)

Retirements reported in A/C 342 and A/C 314 represent the cost of the old water tower that was brought down and well retired.

---

### Water Mains (Page W-15)

Main additions were financed through operating revenues of the Water Utility and developer contributions.

Adjustments for mains were required to adjust to actual per client. Figures were taken from the Utility's new water map that was produced in connection with the water tower project.

---

### Water Services (Page W-16)

Nine of the water service additions were financed through developer contributions. The other four additions were financed through operating revenues of the Water Utility.

---

### Meters (Page W-17)

An adjustment to the number of meters owned was needed to adjust counts to client detail.

---

### Hydrants and Distribution System Valves (Page W-18)

One hydrant was left off the schedule in the prior year, therefore an adjustment was made to reflect the correct number of hydrants.
