### RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include contributed plant in service, property held for future use, or construction work in progress with utility plant in service. These are not rate base components.

At the end of 2002, the Sanitary District completed a Rate Case with the PSC for a change in how the Public Fire Protection fee was collected. The fee is now collected on the water bills. In 2002, the fee was to be collected through the property taxes. The mechanisms were never put in place to do that, so the Sanitary District had to write off the receivables for PFP during 2002.

### HYDRANTS AND DISTRIBUTION SYSTEM VALVES

1. Distinguish between fire and flushing hydrants by lead size.
  - a. Fire hydrants normally have a lead size of 6 inches or greater.
  - b. Record as a flushing hydrant where the lead size is less than 6 inches or if pressure is inadequate to provide fire flow.
2. Explain all reported adjustments in the schedule footnotes.
3. Report fire hydrants as within or outside the municipal boundaries.

**NR811.08(5) recommends that a schedule shall be adopted and followed for operating each system valve and hydrant at least once each two years. Please provide the number operated during the year.**

Number of distribution system valves end of year: 28

Number of distribution valves operated during year: 28

### Water Operation & Maintenance Expenses (Page W-05)

**For values that represent an increase or a decrease when compared to the previous year of greater than 30%, but not less \$2,000, please explain.**

The Sanitary District needed an audit including an A-133 audit of 2001. The majority of that expense was incurred and paid for in 2002. In 2003, the Sanitary District did not need an audit, however, they retained the auditor to prepare the 2002 PSC Annual Report. The cost of this work was less expensive than the audit.

The Sanitary District had to pay for lightning damage to the plant in 2002 because the damage occurred prior to their insurance policy was in force. The costs in 2003 were substantially lower because this is a new plant which needed very little in terms of repairs.

The Sanitary District had greater office expenses in 2002 because they were just started to operate and had many start-up costs. 2003 expenses were substantially lower because they had many supplies still from 2002 and didn't need to pay for expensive equipment like computer, printer and fax.
