1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include contributed plant in service, property held for future use, or construction work in progress with utility plant in service. These are not rate base components.

FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

WATER OPERATING SECTION FOOTNOTES

Water Utility Plant in Service --Plant Financed by Utility or Municipality-- (Page W-08)

If Additions for Accounts OTHER than 316, 343, 345, 346 and 348 exceed \$10,000, please explain. If applicable, provide construction authorization.

Electric Pumping Equipment (325) - Costs are related to pump #3, which was completely rebuilt during the year.

Pumping and Purchased Water Statistics (Page W-12)

General footnotes

Due to the utility's water tower capacity, there were several days throughout the year with no gallons pumped. Date given for the minimum was haphazardly selected from a list of these days.

Water Services (Page W-18)

If net additions are greater than zero, please explain financing by following criteria listed in schedule headnote No. 3.

Additions were financed by the water utility.

Meters (Page W-19)

Explain program for replacing or testing meters 1" or smaller.

Problems in the sewer utility took time away from meter testing in 2006. Utility personnel are aware of the testing requirements and will make up for the difference in future years.

Ss. PSC 185.83(2) states "Station meters shall be maintained to ensure reasonable accuracy and shall have the accuracy checked at least once every 2 years." Are all station meters being tested every two years? Answer yes or no. If no, please explain.

No. Station meter was replaced during the year with an electric meter. Per sales representative, these meters have no moving parts to wear out and, therefore, do not need to be calibrated.
